

Muttseehütte SAC

Linthal, Switzerland

Architect	Büchel Neubig Architekten GmbH, Weinfelden, Switzerland
Facade	Clinar Nobilis Custom Color
Location	Muttsee, Linthal (GL), Schweiz
Photographer	Juerg Hostettler, Winterberg, Switzerland
Type of Building	Sports & Recreation

High up in the Swiss Alps, surrounded by rocky mountains at 2,501 meters above sea level, is the Muttseehütte. The facade is covered with elongated fiber cement panels in a strong red color. From the onset of winter until spring, the impressive hut is snowed in and inaccessible. This is a good proof of the high weather resistance of Swisspearl fiber cement. From June to October, the hut is a hospitable contact point for mountain sports enthusiasts; in winter, it serves as an unmanned refuge. A mystical place to enjoy the Swiss mountains.
